

Testing Report

Sabina:

You did a very good job with your project. I really enjoyed playing your game! I loved the pacman wallpaper and the trophy at the end! I also liked how you had multiple projectiles for both players. It would be awesome if you could make the boss' bullets track you. Great job!

Response:

Thank you for your report! I am glad that you like my game. I have put in a system for the bosses bullets to track the ship. This has made the game a lot more challenging.

Sonal Puri:

I loved your project! The graphics and sprites were great and I thought the text engine was really cool! One thing you can improve upon is a way to restart the game if the player chooses to do so.

Response:

Thank you for the feedback! Your idea for improvement was a great one and I made sure to implement it. I now have a screen so that the player can choose to end the game or restart from the beginning.
